Education

University of Wisconsin – Madison Madison, WI

Bachelor of Science in Computer Science and Data Science, Certificate in Game Design *Aug. 2023 – Present*

- Expected Graduation: May 2026
- GPA: 3.87

University of Wisconsin – Milwaukee Milwaukee, WI

Bachelor of Science in Computer Science *Aug. 2022 – May 2023*

Projects

Last One Standing | *Unity, C#, Git* Feb. 2025 – Apr. 2025

- Designed and developed a narrative-driven college survival game focused on stat management and decision-making
- Successfully crowdfunded for the next development phase (full release planned in 2026)
- Built branching storylines with 8 unique endings and player-driven outcomes
- Expanding content with new episodes, mini-games, and redesigned UI/UX for replayability
- Responsible for all game design, narrative, and production using Unity and C#

Beat the Sushi | *Unity, C#, Git* Mar. 2025 – May 2025

- Developed a rhythm-based mini-game where players place sushi to the beat across multiple stages
- Implemented a custom note-timing and spawning system using Unity timing functions for frame-accurate synchronization between music and gameplay
- Designed game concept, core mechanics, and full UI/UX pipeline

Badger Booze | *Unity, C#, Git* Aug. 2024 – Dec. 2024

- Designed and developed a mobile bartender tycoon game with point-and-click and motion-based controls
- Implemented tilt and shake input mechanics using Unity's accelerometer to mix drinks and serve customers interactively
- Created the full UI/UX, including layout, visual assets, and animations to enhance player engagement
- Built core gameplay systems: order randomization, drink composition, daily analysis,and recipe unlock progression
- Managed team workflow with Git for version control and Notion for task tracking

Jelly Room | *Unity, C#, Git* Oct. 2024 – Feb. 2025

- Developed an interactive idle game where players collect and manage jellies to earn in-game currency
- Implemented key mechanics including touch interactions, leveling, and an in-game economy

Last Call | *Unity, C#, Git* Oct. 2025 – Present

- Designed and developing a bartender simulation game focused on crafting and condition-based orders
- Built the core gameplay system that calculates drink stats and evaluates order conditions for variable rewards
- Conducted iterative balancing using R to fine-tune ingredient values and maintain fairness between recipes
- Developed a scalable, data-driven order system with mandatory and optional conditions for dynamic outcomes
- Planned a post-release narrative expansion, transitioning the game into a story-driven management experience

Lucid Ledger | *GameMaker, Git* Oct. 2025 – Dec. 2025

- Led development of a deck-driven business simulation game where players buy, reshape, and sell dreams for profit.
- Managed production schedule, delegated tasks, and facilitated team communication across design, art, and programming.
- Designed UI wireframes and gameplay flow to ensure intuitive player experience and clear feedback.
- Produced the game trailer, delivered the project presentation, and maintained project timelines.
- Contributed to UI/UX by creating in-game icons and visual assets.

Project Inside Story | *Unity, C#, Git* May 2024 – Present

- Developing a narrative-driven mystery game where players uncover the truth behind a murder case.
- Designed an interactive clue-gathering system featuring conversations, chat logs, keyword searches, and direct confrontations
- Built branching storylines that adapt to player choices, exploring misinformation and its social consequences
- Lead game designer and narrative writer, focusing on player-driven discovery and moral ambiguity

Technical Skills

Languages: C#, C, Java, R, Python, JavaScript, HTML/CSS, Kotlin, SQL
Frameworks & Engines: Unity, Android Studio, JUnit, React
Developer Tools: Git, Visual Studio, Eclipse, Docker
Other Skills: Game design, Blender (modeling/animation), UI/UX design, Figma, Notion, Adobe Photoshop/Illustrator/After Effects/Premiere
